

BOTOX

Reduce Wrinkles and Fine Lines

WHAT IS NON-SURGICAL FACIAL REJUVENATION?

Non-surgical facial rejuvenation is a minimally-invasive cosmetic procedure with little to no downtime that restores a more youthful appearance. At Sona we offer several options for non-surgical facial rejuvenation which include: Botox®, Juvederm™, and Radiesse®.

WHAT IS BOTOX?

Botox is an injected prescription medicine that is used to reduce facial lines and wrinkles. Clients request Botox to have a more relaxed refreshed appearance. Botox is a quick and minimally invasive procedure consisting of a few injections for relaxing lines and wrinkles.

COMMON TREATMENT AREAS INCLUDE:

- Between brows
- Forehead lines
- Brow lift
- Crows feet
- Around the mouth

No anesthesia is required. Although you may see a marked improvement, a treatment with Botox cosmetic does not make you look like you have “had work done”. You can expect to see results within 3-10 days after your treatment, and the visible results have been shown to last up to four months. Sona MedSpa's clinical staff will help you determine which options are best for you. For some clients dermal fillers and Botox are used together to obtain the desired effect.

WHY CHOOSE SONA DERMATOLOGY & MEDSPA?

Sona has been awarded the prestigious Black Diamond status by Allergan, makers of Botox and Juvederm, ranking Sona among the top 1% of providers in the country. You can feel confident choosing Sona's experience and certified, trained medical providers. Plus, when you join the Brilliant Distinctions program, you earn points with each treatment toward discounts on future treatments. Ask your consultant for details today.
